Performance and Analysis

Business Performance Summary

The Company's operating results for the six-month period of 2023 was improved both in terms of revenue and profitability due to the addition of new clients and effective cost control e.g. fuel consumption and maintenance costs. But there are also higher financial cost expenses according to the Bank's interest rate adjustments.

The Company's gross profit and net profit is increased according to the graph below.

Key Milestones

- The Company invested in 13 new service vehicles, comprising 3 buses, 14 vans and 4 minibuses. Moreover the 9 buses of 10 years depreciated were sold and 43 fully installment payment in service vehicles.
- To increase the efficiency of service cost management, such as fuel consumption, maintenance and renovated costs, and wages and other benefits of drivers to achieve the target gross profit margin.

Risk Management Policy

Value of Investment Power Energy

Study and collect sufficient data on all processes of electric vehicles to create future performance instead of petrol vehicles.

Study of investment characteristics of electric vehicles that are suitable for the Company's bus operations.

Driver shortage

• Set a policy for both short-term and long-term compensation and welfare that is appropriate and stable.

• Training and creating awareness of work consciousness, along with raising the level of professional service.

Provided enough employees who able to drive to substitute for the drivers.

Status of transportation vehicles 632 units
